

Sunreef 68 Supreme

€2,600,000

Ref: NM2506

Location: Valencia

Length: 20,5m

Rosa del Mar is a declination of the Sunreef Yachts Supreme 68 line which highlights innovative technical solutions and habitability. With a length of 21 m, it has a living space worthy of a superyacht, namely 300 m². Like its sailing counterpart, the Supreme 68 Power has an architecture and superstructure design that allows it to keep the saloon, the owner's cabin and the exterior deck on the same level.

The saloon framed by a 360° bay window opens onto the cockpit and the gangways. This creates a large interior/exterior space when the sails are folded on each side of the yacht. The yacht's 65 m² nacelle accommodates a large owner's cabin with access to the front terrace and its spa. At the rear, a huge garage can store a big tender and plenty of water toys. In the lowered position, the door creates a platform on the water, to enjoy the sea or indulge in water sports. A technical space that is quite surprising for a boat of less than 70 feet.

The interior provides an elegant and unique layout.

On the flybridge, covered with a bimini that houses the cockpit, there is a bar, a dining area and sunbathing areas.

The Supreme 68 Power is equipped with 2 x 500HP engine for maximum performance and maneuverability. A joystick is installed in the cockpit as well as remote command Yacht Controller and rear cameras to facilitate mooring. With a fuel capacity of 8500 L, Rosa del Mar has a huge autonomy, almost 900NM, at very low consumption.
